

UDIT KRISHNA

Software Engineer | Python Developer | Full-Stack Developer | FinTech & Operations Analyst

Prayagraj, Uttar Pradesh | +91 8081780995
uditkrishna133@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer and Python Developer with professional experience across FinTech operations, customer account management, backend workflow execution, and full-stack application development. Experienced in supporting high-volume operational environments within financial services and e-commerce domains while maintaining compliance, accuracy, quality standards, and SLA commitments. Skilled in Python, SQL, Django, ASP.NET, JavaScript, Machine Learning, REST APIs, and modern web technologies. Proven ability to analyze business requirements, resolve operational issues, improve workflows, and collaborate across cross-functional teams to deliver reliable technology and business solutions.

CORE COMPETENCIES

Python Development • Full-Stack Development • SQL • Django • ASP.NET • JavaScript • REST APIs • Machine Learning • Data Analysis • Financial Services Operations • Banking Operations • Process Management • Customer Account Operations • Transaction Review • Risk & Compliance • SLA Management • Technical Documentation • Workflow Management • Business Analysis • Problem Solving • Cross-Functional Collaboration • Agile Methodology

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, C#, JavaScript

Frameworks & Libraries: Django, ASP.NET, ReactJS, TensorFlow, Scikit-learn, NumPy, Pandas

Web Technologies: HTML5, CSS3, Bootstrap, Responsive Design, REST APIs

Databases: SQL, SQLite

Tools & Platforms: GitHub, Visual Studio Code, Figma

Concepts: SDLC, Machine Learning, Backend Development, OOP, Database Management, Technical Documentation, Process Optimization

PROFESSIONAL EXPERIENCE

Genpact | Process Associate – Affirm Process | Present

- Support customer account operations and transaction-related workflows within the Affirm financial services process.
- Perform transaction reviews, account validation activities, issue investigation, and resolution tasks while maintaining quality and compliance standards.
- Maintain process documentation and operational records supporting audit readiness and process transparency.
- Work within SLA-driven environments, ensuring timely completion of assigned activities and adherence to established procedures.
- Collaborate with operations, quality, and support teams to resolve exceptions and improve customer outcomes.

Amazon Development Centre (India) | Customer Service & Backend Operations Associate | May 2025 – Oct 2025

- Managed backend order lifecycle processes, workflow exceptions, and transaction-related operational activities.
- Investigated and resolved order and account-related issues while adhering to organizational policies and procedures.
- Coordinated with internal stakeholders to support issue resolution, workflow continuity, and operational efficiency.
- Maintained accurate documentation and delivered results within a performance-driven environment requiring accuracy and attention to detail.

PROJECTS

NeuroScan – AI-Based Mental & Cognitive Disorder Detection System

- Designed and developed a machine learning-based platform for preliminary assessment of mental and cognitive health indicators.
- Implemented NLP and predictive analytics techniques using Python, TensorFlow, and Scikit-learn.

- Developed classification workflows supporting identification of Depression, Anxiety, PTSD, OCD, and Bipolar Disorder indicators.
- Built a modular architecture to support future enhancement and scalability.

Shree Radha Krishna Enterprises – E-Commerce Website

- Developed a database-driven e-commerce platform using Django, Python, SQL, HTML, CSS, and Bootstrap.
- Implemented user authentication, inventory management, order processing, and product catalog management.
- Designed backend workflows and responsive user interfaces for improved user experience.

Beadz Store – Full-Stack E-Commerce Website

- Developed a full-stack jewelry e-commerce application using ASP.NET, SQL, JavaScript, HTML, and CSS.
- Implemented authentication, product catalog management, and order processing functionality.
- Designed relational database structures and responsive interfaces supporting online business operations.

INTERNSHIPS

Python Development Intern – Brainwave Matrix Solutions | Feb 2025 – Mar 2025

- Developed Python-based applications and strengthened programming, debugging, and problem-solving skills.
- Participated in software development activities following structured workflows.

Content Writing Volunteer – Earth5R | Mar 2024 – Apr 2024

- Conducted research and created content supporting sustainability and awareness initiatives.

Video Editing Intern – CareerCorps | Nov 2023 – Dec 2023

- Assisted in digital content creation and video editing while meeting project timelines.

CERTIFICATIONS

- Agentic AI for Developers: Concepts and Applications for Enterprises
- Build AI Agents and Chatbots with LangGraph
- Agile Software Development
- SQL and Relational Databases 101
- Machine Learning using Python
- VLSI for Beginners
- Embedded Systems for Beginners
- Introduction to MATLAB & Simulink

EDUCATION

Bachelor of Computer Applications – University of Allahabad (2025)

Intermediate (Class XII) – Bishop Johnson School & College (2022)

High School (Class X) – Bishop Johnson School & College (2020)
